108	3/2/25	Bull	Black	68	Cast CC

At birth, calves received: First Defense Dual Force paste, Alpha 7, iodine naval dip & Multimin.

As a sale stress preventative, all baby calves got Draxxin prior to sale.

Gonsior pregnancy testing was completed by Dr. Cody Gulbrandson, Beaver Creek Vet Services, in October 2024. Due dates are best estimates.

At that time, heifers had breeding shots. Scourguard, and were wormed/poured. They were wormed, poured & boosted with Scourguard again in January. All heifers are enrolled in the THE program of the American Simmental Association...first calf will be/can be registered for free.

2025 Gonsior Simmentals Vet Estimated Due Dates/Sire

LOT	Sire	Estimated Due Date
92	Trif Western Feel	March
94	Trif Western Feel	March
103	Out of Sale	
105	Out of Sale	
106	Cast CC 343L	March
109	Trif Western Feel	Late March-April

All open heifers have had a full vaccination protocol, and their initial breeding shots in late January. They were also given magnets and wormed/poured at that time. Several open heifers have been tied several times.

Herd health handled by Dr. Lance Kurz & Dr. Kara Valasek, Countryside Vet Clinic, and Dr. Cody Gulbrandson, Beaver Creek Vet Services. E.T. work handled by Dr. Phil Buhman, Preferred Genetics for Bovine.
